Profile

I am a Front-End Software Developer. Still at university, together with a team of international specialists, I developed a software in the field of renewable energy. For more than 2 years, as a freelancer, I have been pursuing various projects including application development, website programming and digital marketing.

I consider myself a highly determined, curious and open person. I always put a lot of effort and passion into the activities I carry out. I am precise, motivated and I always try to reach the set goals. I like to study and learn so I have taken various courses, even recently, to be always updated on new tech solutions.

Experience

Software engineer- ECIE – 2018 - jun 2019

Develop mobile app and web site for the control of projects, personal in the work areas and working time, using Java, HTML, CSS and JavaScript technologies.

Self-employed – 2019 - Now

Web development, portfolios, e-commerce frontend development, small business website, seo optimization, analytics, Ads campaigns and maintenance, using Wordpress, ReactJS, Angular, JavaScript, HTML, CSS.
